Cropton 5KW

The Cropton stove combines an attention-grabbing large glass window, slimline body, 5kW output, and incredibly low emissions.

Meeting and even beating all the criteria for the new 'ECODESIGN' legislation for lower emissions due to take effect in 2022, when independently tested, the Cropton came away with CO Emissions of only 0.05%, an amazing 50% below the 'ECODESIGN' standard. This makes the Cropton a perfect choice for a 'future-proofed' stove that will be a statement piece for years to come.

While still giving out the perfect heat output for most rooms, the larger than average but slim body allows the Cropton to give a much more striking view of the flames. Controlled simply with 2 levers as standard, the Cropton also includes the option of installing an 'Outside Air Kit' which can be controlled by remote, so you can adjust the flames from the comfort of your sofa!

Cropton Features:

- Defra Smoke Control Model
- 2022 'ECODESIGN' ready
- CO/CO² emissions 0.05%
- 5kW output
- Multifuel
- British Made
- Energy Efficiency Class: A+
- Energy Efficiency Index: 108
- 5" diameter flue (top flue only)
- Slimline stove only 280mm/11" deep
- Suitable for 12mm hearth
- Simple controls
- Built in Tertiary Air
- Optional Outside Air Kit – Manual or Remote Control
- Brass or Stainless Steel Handle
- Maximum log length 300mm

- 81.2% Efficient on Wood
